Hazard Analysis

IT IS CRITICAL TO USE THE RIGHT EXTINGUISHER FOR THE RIGHT APPLICATION

Prepare for a fire emergency by ensuring that the right fire extinguisher for the environment is the closest one.
If a fire event occurs, grab the fire extinguisher and remember the **PASS** method (***Pull, Aim, Squeeze, Sweep***).

	ABC Dry Chemical	Purple K	Clean Agent	HT Series	Class K Wet Chemical	Z-Series (*Purple K* / *ABC Dry Chemical*)	Water	Water Mist	Carbon Dioxide	Class D Dry Powder

Classes of Fire

- **A** — Wood, paper, cloth, rubber, and many plastics
- **B** — Gasoline, petroleum greases, tars, oils, oil-based paints, solvents, alcohols, propane, and butane
- **C** — Fires involving live electrical equipment
- **D** — Magnesium, titanium, zirconium, sodium, lithium, and potassium
- **K** — Cooking oils and animal fats
