HAND-PORTABLE FIRE EXTINGUISHERS

AMEREX®

Quality is Behind the Diamond®

PORTABLE FIRE EXTINGUISHERS FROM **AMEREX**

DESIGNED AND MANUFACTURED IN THE USA

Amerex portable fire extinguishers have been the industry standard for more than 50 years. Since 1971, our commitment to quality, service, and innovation has been unmatched. **Quality is Behind the Diamond**®—in every product.

At Amerex, quality is a mindset. It is the standard that drives us. Our business has grown year after year based on our products' reputation for performance and durability even in the most rugged environments. Amerex produces fire extinguishers for every application that go through quality audits at each level of production. With warehouses strategically located in Oakland, New Jersey; Elk Grove Village, Illinois; Santa Fe Springs, California; and Trussville, Alabama, our customers are assured that product lead times are at a minimum.

For more detailed product and ordering information, visit *webstore.amerex-fire.com*.

Longer life, lower cost, and the best warranty in the industry—**that's quality behind the diamond.**

All Amerex Fire Extinguishers comply with the recommendations of the **National Fire Protection Association** and are tested and rated by **Underwriters Laboratories** or **FM Global** to **UL Standards.**

WHERE TO USE

Amerex manufactures a variety of hand-portable and wheeled fire extinguishers, both “compliance” (code required) and “specialty” types.

“Compliance” extinguishers are designed to meet and exceed state or local fire protection requirements. “Specialty” extinguishers are intended for use on particular types of hazards, so they should be placed in close proximity to the specific hazard they are meant to protect. It is natural for a person to use the extinguisher located nearest to a fire. The most current issue of NFPA-10 should be consulted for minimum recommended fire extinguisher types, placement, and travel distances. Your local Amerex Fire Equipment Distributor is professionally equipped to evaluate and implement these recommendations. All “Pictograms” are detailed below and should be reviewed with all who might be expected to use a fire extinguisher. Everyone should be familiar with these picture symbols that identify the types of fires on which they may be used. The international sign system diagonal red slash indicates a potential danger if the extinguisher is used on that particular type of fire hazard.

CLASSES OF FIRE			
Class A	Ordinary combustibles	*Wood, paper, rubber, fabrics, and many plastics*	
Class B	Flammable liquids & gases	*Gasoline, petroleum greases, tars, oils, oil-based paints, solvents, alcohols, propane, and butane*	
Class C	Live electrical equipment	*Fires involving live electrical equipment*	
Class D	Combustible metals or combustible metal alloys	*Magnesium, titanium, zirconium, sodium, lithium, and potassium*	
Class K	Fires in cooking appliances that involve combustible cooking media	*Cooking oils and animal fats*

Class A:B	
Class A:B:C	
Class A:C	
Class B:C	
Class D	
Class A:K	

HOW TO USE

All Amerex extinguishers are furnished with a detailed “Owner’s Manual” containing valuable information on the installation, use, and maintenance of the extinguisher. The extinguisher nameplate contains specific information on “HOW TO USE” the particular extinguisher. The label instructions vary slightly according to type and size. Potential operators should be familiar with the instructions on any extinguisher they might be required to use.

WATER

240
P/N 00100

MODEL 240 utilizes the cooling, soaking, and penetrating effect of a 45- to 55-foot stream of WATER. The 55-second discharge time makes it very effective for inexperienced operators for use on Class A fires that include combustibles such as wood, cloth, paper, and many plastics. This extinguisher is constructed with a chrome-plated brass valve and polished stainless steel cylinder, which helps eliminate corrosion.

EXTINGUISHER SHIPS EMPTY

RUGGED

- 5-Year manufacturer's warranty
- Stored-pressure design
- Polished stainless steel cylinders
- All-metal valve construction
- Exclusive crevice-free, butt-welded cylinder
- Temperature range 40°F to 120°F

USER-FRIENDLY

- Maximum visibility during discharge
- Large loop stainless steel pull pin
- QR coded and multilingual labels

OPTION

- Model 506B anti-freeze charge (Temperature range -40°F to 120°F)

THE MODEL 240 MAY BE FREEZE-PROTECTED TO -40°F BY ADDING A MODEL 506B CHARGE

WET CHEMICAL

WET CHEMICAL extinguishers are the best restaurant kitchen appliance hand-portable fire extinguishers you can purchase. Each model utilizes a specially blended potassium acetate base agent and has been tested and approved by UL for restaurant kitchen hazards. The recent trend to more efficient cooking appliances and use of vegetable-based cooking oils dictates the use of a hand-portable fire extinguisher with greater fire-fighting capacity and cooling effect to combat these very hot and difficult fires. The Class K is available in two sizes; 6 liter or 2½ gallon—with attractive stainless steel cylinders and easy-to-use hose-and-spray application nozzles. The superior fire-fighting capability of the Wet Chemical agent is placed exactly where you aim it with no dry chemical residue to clean up. Models C260 and C262 are the ideal "KITCHEN USE" fire extinguishers. They supplement existing cooking equipment automatic system protection for the extra margin of safety.

WATER MIST

WATER MIST is the ultimate extinguisher for Class A fires and for locations where potential Class C (electrical) hazards exist. The fine spray from the unique misting nozzle provides safety from electrical shock, greatly enhances the cooling and soaking characteristics of the agent, and reduces scattering of burning materials. The Amerex Water Mist extinguishers contain deionized water (sold separately) making them the best extinguishers for protection of hospital environments, telecommunication facilities, and "clean room" manufacturing facilities. The Amerex Water Mist extinguishers are easy to use, maintain, and service.

RUGGED

HALOTRON® BrX (2-BTP)

HALOTRON® BrX (2-BTP) Amerex provides a unique solution for Halon 1211 replacement. These extinguishers utilize Halotron® BrX to fulfill the next generation of aviation extinguisher requirements. BrX has a low Global Warming Potential (GWP) and very low Ozone Depletion Potential (ODP) clean agent approved for use on commercial aircraft. The extinguishers are constructed of lightweight aluminum valves and cylinders (Model 351 uses a steel cylinder). Models 349 and 351 include a hose that allows the operator greater flexibility for utilization in tight spaces. Amerex is the solution for the aviation portable extinguisher needs.

RUGGED

- 6-Year manufacturer's warranty
- Stored-pressure design
- Aluminum cylinders (Model 351 uses a steel cylinder)
- Durable high-gloss polyester powder paint
- All-metal valve construction
- Hose is unique to Amerex product (Models 349 and 351)
- Extinguishers are maintained in accordance with NFPA 10
- Hose provides greater access to tight spaces—offering greater flexibility when using the extinguisher (Models 349 and 351)
- Temperature range -40°F to 120°F

FAA APPROVED

- Models 339, 347, 349 and 351 are FAA approved in accordance with DOT/FAA/AR-01/37

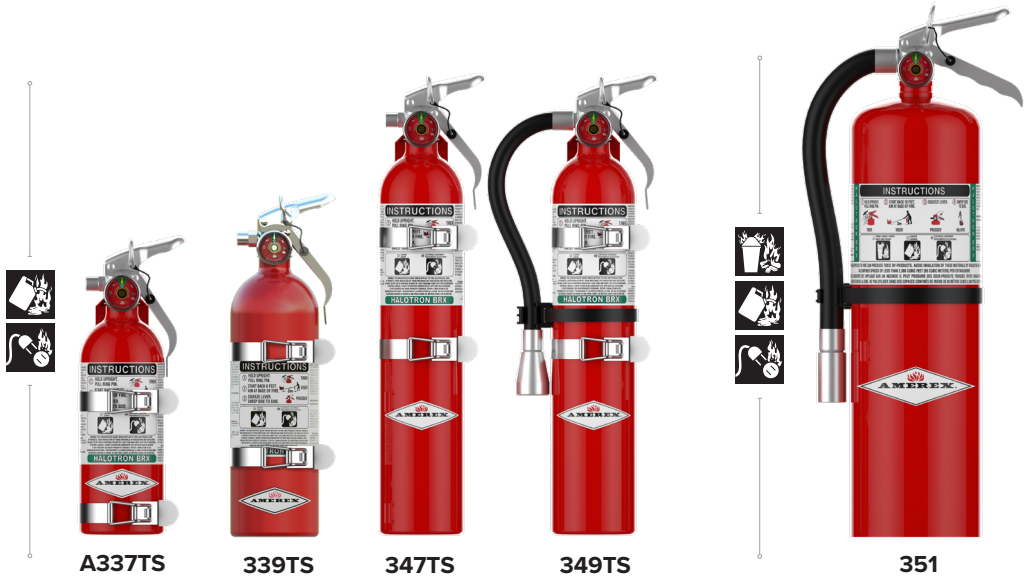

USER-FRIENDLY

- Maximum visibility during discharge
- Large loop stainless steel pull pin (Model 351)
- No electrical conductivity back to the operator
- No thermal or static shock
- Leaves no residue
- QR coded and multilingual labels

ENVIRONMENT

- EPA approved "clean agent" for Class A, B and C hazards
- Low GWP – 0.26 (100 year)
- Low ODP – 0.0028
- Short atmospheric lifetime

HALOTRON® BrX EXTINGUISHERS HAVE A 12-YEAR SERVICE LIFE AND ARE NON-RECHARGEABLE

HALOTRON® I

HALOTRON® I clean fire extinguishing agent discharges as a rapidly evaporating liquid, which is non-conductive, noncorrosive, and leaves behind no residue. Halotron® I is the clean agent market leader with a history of successful real-world protection of valuable assets. From model-scale aircraft to wide-body commercial aircraft, from data centers to pharmaceutical and other industrial plants, the Halotron® I agent has been used to extinguish the fire, limit damage, and help reduce downtime that can be caused by other agents.

Applications for these extinguishers include: data centers, laboratories, manufacturing plants, general office areas, computer rooms, telecommunication facilities, clean rooms, control rooms, warehouses, military electronics, vehicles including classic autos, boats, engine compartments, aircraft ramps, onboard aircraft, and in facilities that service aircraft and any facility where dry chemical extinguishers could cause unacceptable damage or contamination.

HT SERIES

THE HIGH PERFORMING HT-SERIES for commercial settings, once exclusive to the aerospace industry, can safely put out fires without damaging electronic equipment, specialized machinery, or other delicate materials. That also means that there is no clean-up or down time for your operations. Industries such as health care, clean manufacturing, data processing centers, and museums all benefit from the HT Series. These extinguishers are also sensitive to the environment, meeting strict environmental regulations for Global Warming Potential and Ozone Depletion Potential. With knock-down power and firefighting efficiency, the HT-Series using Halotron BrX agent features aluminum cylinders (Model 551 uses a steel cylinder), durable high-gloss polyester powder paint, and all-metal valve construction. Maximum visibility during discharge, a large stainless steel pull pin, and no electronic conductivity back to the user make these extinguishers extremely easy to use.

RUGGED

- **6-Year manufacturer's warranty**
- 12-year service life; non-rechargeable
- Stored-pressure design for simple inspection
- Durable, high-gloss polyester powder-coat finish
- All-metal valve construction
- Robust cylinders crafted from high-quality steel or aluminum
- 7-day atmospheric lifespan
- A low-GWP and very low-ODP product
- Temperature range -40°F to 120°F

USER-FRIENDLY

- Leaves no residue
- No thermal or static shock
- Flexible hose, all-metal hose for easy use

CARBON DIOXIDE

322NM
P/N 17738

These DOT-approved shells have date stamped on cylinder shoulder.

CARBON DIOXIDE is discharged as a white cloud of "snow," which smothers a fire by displacing oxygen. It is effective for Class B flammable liquids and is electrically non-conductive. Carbon Dioxide is a clean, non-contaminating, odorless gas.

ABC DRY CHEMICAL

ABC or **MULTI-PURPOSE** extinguishers utilize a specially fluidized and siliconized mono ammonium phosphate dry chemical. It chemically insulates Class A fires by melting at approximately 350°F and coats surface where it is applied. It smothers and breaks the chain reaction of Class B fires and will not conduct electricity back to the operator.

PURPLE K DRY CHEMICAL

PURPLE K extinguishers contain specially fluidized and siliconized potassium bicarbonate dry chemical that is particularly effective on Class B flammable liquids, pressurized gases, and Class C electrical fires. It is electrically nonconductive. PURPLE K has been the choice of oil, gas, chemical, and utilities industries as the preferred fire-fighting agent.

RUGGED

- **6-Year manufacturer's warranty**
- Stored-pressure design
- Dependable drawn-steel cylinders
- Durable high-gloss polyester powder paint
- Temperature range -65°F to 120°F
- All-metal valve construction

BRASS VALVE—Heavy Duty
- Chrome-plated brass valve body
- Stainless steel handle & lever

ALUMINUM VALVE—Light to Medium Duty
- Anodized aluminum valve body
- Anodized aluminum handle & lever

USER-FRIENDLY

- Easy and economical to maintain and service
- QR coded and multilingual labels

OPTION

- USCG approved with bracket listed on UL label
- Chrome cylinders (see chart below)

CLASS D

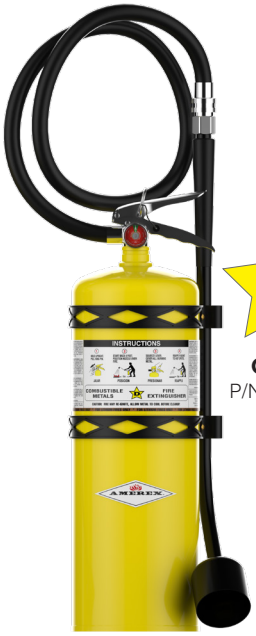

B570
P/N 16882

MODEL B570 contains a special blended sodium-chloride-based dry powder extinguishing agent. Heat from the fire causes it to cake and form a crust excluding air and dissipating heat from burning metal. Metal fires involving magnesium, sodium, potassium, and sodium-potassium alloys can be successfully extinguished with this extinguisher. There is data showing that zirconium, uranium, titanium, and powdered aluminum fires can be controlled and extinguished with this unique extinguisher.

AVAILABLE IN 150-LB. WHEELED EXTINGUISHER

Extinguishing Capacity *30-lb. Super D Dry Powder*	Fire Ratings *Approximate Hazard Size*	
HAZARD	**Area** FT² (m²)	**Quantity of Metal** LBS (KG)
Magnesium chips	4 (.37)	6 (2.72)
Sodium spill	5 (.46)	5 (2.26)
– Depth over ½ inch (1.3 CM)	3 (.27)	6 (2.72)
Potassium spill	5 (.46)	5 (2.26)
– Depth over ½ inch (1.3 CM)	3 (.27)	6 (2.72)
Sodium potassium alloy spill	3 (.27)	2 (.9)

C571
P/N 27576

MODEL C571 contains a copper extinguishing agent specially developed by the U.S. Navy for fighting lithium and lithium alloy fires. The copper compound smothers the fire and provides an excellent heat sink for dissipating heat. Copper powder has been found to be superior to all other known fire extinguishing agents for lithium metal fires. ***Not recommended for lithium-ion battery fires.***

AVAILABLE IN 250-LB. WHEELED EXTINGUISHER

Extinguishing Capacity:
4 ft.² and/or approximately 5 lbs. of lithium metal

The Amerex "soft flow" extension applicator is particularly suited for fighting **CLASS D** fires. It allows the operator to stand away from the extreme heat and toxic fumes caused by burning material. The easily controlled, even discharge provides a non-dispersing application of the agent. The extension applicator may be quickly detached to provide a straight stream of chemical where greater range is required.

RUGGED

- 6-Year manufacturer's warranty
- Stored-pressure design
- Dependable drawn-steel cylinders
- Class D color-coded paint finish
- All-metal valve construction
- Temperature range -40°F to 120°F

USER-FRIENDLY

- Unique "soft flow" extension applicator plus built-in long-range nozzle
- Large loop stainless steel pull pin
- QR coded and multilingual labels

OPTION

- Model 859 dolly cart provides for easy transport

**MODEL C571 Due to the density of copper, extra agent is added to achieve 30 lbs. of agent discharge at a 45° angle.*

THE ACTUAL EXTINGUISHING RECHARGE AGENT QUANTITY IS 41½ LBS.

Z SERIES HIGH PERFORMANCE

Z-Series extinguishers are the ultimate choice in fire extinguishers for high hazard, frequent use, and extreme environment applications. They are economical—less initial cost, lower maintenance costs, and greater reliability than cartridge-operated extinguishers. Amerex Z-Series extinguishers are available with a proprietary, zinc-enriched coating that resists corrosion for up to 12 years in severely salt-contaminated environments.

RUGGED

- **12-Year manufacturer's warranty**
- Zinc-enriched coating
- All-metal valve construction
- Chrome-plated brass gauge guards
- Protective rubber foot rings
- Superior vertical and horizontal range
- Higher operating pressure
- Temperature range -65°F to 120°F

AGENTS

- ABC or Purple K

USER-FRIENDLY

- Wide grip allows clearance for gloved hands
- Large loop stainless steel pull pin
- QR coded and multilingual labels

Why Amerex ?

QUALITY
Amerex didn't become a global market leader overnight. Our business has grown year after year based on our products' reputation for performance and durability in even the most rugged environments.

INNOVATION
Because Amerex is privately owned and forward thinking, we are continuously innovating and investing for the benefit of our customers and those they serve.

SERVICE
Amerex was founded on a mutual appreciation for premium quality in products, customer service, and the importance of interpersonal relations.

Amerex Corporation makes every attempt possible to provide the most current and updated information. Information contained within this brochure is deemed to be as accurate as possible as of the printing date. Routine changes to products, codes and standards, and warranties subsequent to this printing will supersede printed information. Please contact Amerex Corporation for any revisions, updates, or product changes.
